Michael Dorcy, Land Use Planner
Seattle Department of Planning and Development
PO Box 34019
Seattle, WA 98124-4019

Dear Mr. Dorcy:

Per our recent discussions Seattle Parks and Recreation Department is revising the scope for project 2400368, as submitted to DPD on March 1, 2004. We are revising the pole height for parking lot and roadway light poles to 30-feet tall.

Forty-foot tall parking lot and roadway light poles were designated in the original submittal, and totaled 39 roadway poles and 36 parking lot poles.

By reducing the height of these light poles, we understand that this removes them from consideration as part of the Type V Council land use action.

Sincerely,

Kevin Bergsrud, Planning and Development Specialist
Seattle Parks and Recreation
